

People often say that " Learning is the ladder of human's progress" . That sentence is quite reasonable, but in fact, the word "school" in ancient Greek means amusement. It reminds us that learning is not such a terrible thing at first. But what's unfortunate is learning has become the most worrisome work of students.

I was one of them who regarded learning as a torture. The reason was simple, I could not do it well. I was diagnosed as suffering from ADHD when I was a child, which resulted in my failure in almost every course. I could not concentrate on what teacher said, on the homework, even on the exam. My head teacher did not like me just as much as I hated learning. Undoubtedly I was the last student in class during that time, which made me feel frustrated.

The Great Learning

Maybe it was the God's mercy helped me. My learning experience had some changes. I got a chance to write a history treatise in my high school. With a nice teacher's help, I firstly found some interesting point in learning. It was exciting to explore the truth of history and put forward different view from the traditional ones. Many thanks to the benevolent god and friendly teacher, I began to love learning.

The pleasure of learning is the pleasure of seeking the knowledge and truth. The world from others' words could not be the real one, so you need to explore it by yourself. That is why the learning is so great and interesting, and have many great thinkers devote their entire life to it.

Before the college entrance examination, I had a clear goal, worked hard every day with enthusiasm, and dreamed of a wonderful life in the University. Hence after entering the University, I attempted to be what I want to be and made a careful plan to supervise myself.

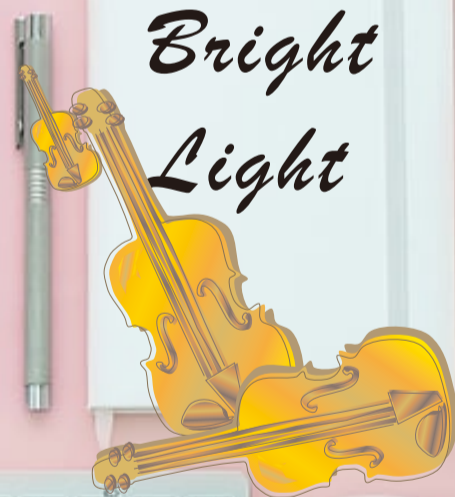

Nevertheless, everything deviates from the track. Endless English words made me drowsy. English articles made me unable to start. Moreover, varied English grammar made me feel headache. What's worse, I felt mobile phone and computer have manipulated me. Where is my motivation for learning? Gradually, I was caught in dark. It lasted a whole month...

One day, however, I happened to see the glorious years of the predecessors of Southwest University of political science and law which I never knew on the Internet. Compared with them, I felt shamed and regretful for my wasting time. Their achievements are what everyone wants to achieve. But not everyone has such perseverance. Would I continue to degenerate? Would I work hard and get a good grade? I ask myself though the answer was already in the bottom of my heart.

Despite Feeling a loss of purpose upset me, the Predecessors' bright lights continued to affect me. It was the light that led me to find what I actually want. Also, it gives me a spiritual comfort in the dark. As the saying goes " A fine example has boundless power" , I would seek for my value with the boundless power.

Bright Light
