The Colorful Life in SWUPL

On that hot and dry afternoon, after leaving my comfortable home, the feeling of loss filled my heart when the vivid memory of my leisure emerged in my mind. Nevertheless, when I was absorbed in magnificent and grand buildings of college. I suddenly recognized it was an important destination in my life. A period of four colorful years is about to sail from here.

To begin with, we had a 12-day military training, which was decorated by laughter and sweat. By portraying military posture in the sun, we realized the great significance of discipline. During the military training, I also got along well with our classmates. I was keen on making friends with those classmates who came from all over the country and whose experience broadened my horizon.

In addition, I joined the Youth Volunteer Association to enrich my college life. I often participated in varieties of meaningful activities, such as visiting the geracomiums, devising relevant schemes and so on. When we faced with some difficulties at work, four seniors always did their best to help us. On the Mid Autumn Festival, they even presented us with splendid gifts and warm postcards, making us freshmen feel at home.

Time flies! In a flash, we started our college lessons: roaming around the constitutional law class, experiencing the happiness of learning a new language-Spanish, and exploring the truth of the world... Most of the teachers are very kind to us, and hold a serious attitude to teaching.

It is my honor to be taught by these great masters in law science.

What has to be mentioned is that we watched the grand military celebrating the 70th anniversary of the People's Republic of China, finding our motherland is becoming stronger and stronger, and we all must devote ourselves to our country.

Wandering from a teaching building to another, I enjoy various scenery on our campus. The streams flow under the bridge, sparkling with the beauty of SWUPL. The mottled walls and wooden floor of classrooms demonstrate countless occasions of cultivating students. The exhibition hall witnesses the glorious history and inherited brilliant spirits of our college.

What a fantastic campus! What a colorful college life!

Wish I could embrace the final success through four years progress.

I love SWUPL!

My Campus Life

We have been staying in our university for nearly two months. Everyone has his own comments on campus life. So let's talk about it in this passage.

I have to admit that I did feel panicked the moment I stepped into campus of SWUPL. It was a totally new environment for me. I must fit into a new social environment and become very independent though was not sure if I can live a comfortable life here at that time.

But now the word "fantastic" could readily be used to describe my campus life.

First of all, the great physical conditions are the foundation of my fantastic campus life. The nature environment of SWUPL is laudable. Trees and flowers are everywhere. The air is fresh and the sunlight is warm. In a word, everything here is full of vitality, which makes my life and study very delightful. Besides, the canteen here is fantastic, too. It's not only because the food is really delicious and full of variety, but also the dining hall is beautifully decorated. These external conditions enable me to have a happy campus life here.

Of course, campus life doesn't only mean play and eat. The most important thing is to learn and equip ourselves with knowledge. Next I would like to talk about my enjoyable study life. The main task of our campus life every day is to study. SWUPL also provides a form. And students here are all studios. For example, the spots in the reading rooms of the library are always fully occupied by students. Besides, the library has an abundant collection of books and provides good learning conditions.

For me, the most meaningful moment in my campus life is when I am studying here. Good studying environment becomes the main reason why I have a fantastic campus life. Campus life is the life of peer students who are pursuing their dreams. We will jointly go through the warm spring, hot summer, fruitful autumn, and romantic winter. Campus life will continue, perhaps the distance is full of frustrations, but we must keep go on.

So no matter how, we are supposed to manage our campus life diligently and look forward to our bright future.
